# Going from idea to publishing shouldn't take more than 3 days

**KOALARANK**
Our goal? To scale your B2B firm.

That's the idea behind Koala Rank's (basic) web design services. It's not meant to provoke web professionals but to inspire results more than pixel-perfect precision, so you can focus on growing your business.

### Your blog live in <3 business days

Although many set their sites up from the home page, your blog is actually a better place to start as it allows you to share your ideas quickly and obtain rankings on search engines to gain traction.

### Zero maintenance–zero headaches

The worst part about bringing a website live is maintenance: unexpected bugs, 404 pages out of nowhere, slow page loads, images disappearing... We take care of all of it on your behalf.

### Built professionally & efficiently

Just because it's brought up quickly doesn't mean we don't care about quality. All the underlying infrastructure, best practices, and UX are taken care of professionally.

## Why choose our web design services?

The way we create sites won't fit you if you're looking for the next award-wining design. We're all about practical results which we deliver by implementing processes that check off all the best practices and turn your website into a beautiful, useful experience.

### 1. Our websites are meant to host useful content

We help you get the "boring" infrastructure live quickly so you can focus on hosting what truly matters: your content. Whether that be a blog post or a case study, we're here to help.

### 2. We only build on the best infrastructure available

Why build a website that's slow and bug-prone when you can have great infrastructure at affordable prices? We partnered with Duda's award-winning CMS for this exact reason.

### 3. Request weekly edits and get support year-round

Our goal is to see you grow your website and business for the long-term. That's why we offer weekly edits and support baked right into our monthly plans.

## WEB BASIC

WEB DESIGN: Basic monthly [USD]
$79.00/month
Go live in less than 3 business days
