

# SEO service has a bad reputation. We're here to change that.

There's a shroud of "mystery" behind most SEO services. And yet they cost an arm and a leg. Koala Rank changes that by clearly stating what benefits you get for the price that you pay. It's as simple as that.

## Focused on business queries

When your ideal buyer searches for a service you offer, you want to appear high on that search. That's what Koala Rank focuses on: getting you to the top of "purchase intent" queries.

## Fully-managed optimization

When you have so many things to think about in your business, SEO is likely the least of your priorities. Yet the ROI is huge. We manage the entire process on your behalf, day in day out.

## ROI-driven weekly reporting

We don't want to provide SEO services unless we can deliver 10x return on your investment. That's why we commit to easy-to-digest yet detailed weekly reports.

## Why choose our SEO services?

SEO is an overcrowded market. We know this. That's why we focus on 3 things that are clearly missing in the space: 1) Transparency in how SEO is going to benefit your B2B firm; 2) Visual reporting (no more Excel sheets!), and; 3) Natural link building.

### 1. Transparency in how SEO benefits your B2B firm

SEO is the backbone to your entire inbound strategy. Without it, you're left to scrambling for outbound prospects manually. And that's a lot more expensive than a Koala Rank subscription.

### 2. Visual reporting with close to zero cognitive load

We're here to help you drive the vision of your business forward. For that, we use visual reports that tell a story rather than swamping you with numbers that don't mean anything to you.

### 3. Authority links that come from reputable websites

While most controversial in SEO, the practice of building links from other websites to yours is key to growth. We handpick links to help you scale for the long-term.
